WORK EXPERIENCE (1/2)

Japan Advanced Semiconductor Manufacturing (JASM)

Jul 2024 – Present

AMHS Software Engineer

▲ System Uptime & KPI Achieved

Manufacturing Dept.

- Maintain transfer KPI within Spec; handle anomaly response & parameter tuning
- Stabilize system settings; manage on-duty shift rotation
- Coordinate with HQ and cross-functional departments for changes & upgrades

Oracle SQL

AMHS

KPI Mgmt

Koki Holdings Co., Ltd. (HiKOKI)

Jan 2021 – Jun 2024

Warehouse Management System Developer (WMS)

▲ Code Quality & Maintainability

Production Engineering Dept.

- Led requirement definition & spec design via user hearings; owned revisions
- Full-stack development with PHP & JS; improved code security and readability
- Standardized development conventions; mentored junior team members

WORK EXPERIENCE (2/2)

May 2020 – Jun 2024

Production Scheduling Support

▲ Man-hours Reduced 20%

Production Management Section

- Created assembly schedules and coordinated with related departments
- Reduced scheduling adjustment time by 20% via master data updates & advance planning
- Cut man-hours by ~20% through Teams information sharing & task distribution

Visual Basic

Oracle

PostgreSQL

MS Teams

Oct 2019 – Apr 2020

IoT Data Analysis & Process Improvement

▲ Measurement Accuracy +27%

Manufacturing Dept.

- Gained hands-on machining knowledge through on-site manufacturing training
- Analyzed existing IoT data; proposed and implemented accuracy improvements
- Improved measurement accuracy by up to +27% via parameter reconfiguration & interface redesign

EDUCATION

Sep 2017 Grad.

National Yang Ming Chiao Tung University (Taiwan)

M.S. Industrial Engineering and Management

2016–2017 Exch.

Kinki University (Japan)

Faculty of Business & Commerce (Exchange Student)

Jun 2014 Grad.

National Yang Ming Chiao Tung University (Taiwan)

B.S. Industrial Engineering and Management

SELF APPEAL

Drive for Continuous Growth

Committed to lifelong learning through courses and certifications. I implement maintainable designs based on thorough understanding of existing specs, earning team recognition for code quality and security improvements.

Quantifiable Results

Scheduling adjustment time and man-hours reduced 20% each. IoT measurement accuracy improved up to +27%. Delivered end-to-end WMS development and standardized dev rules to raise team efficiency.

Multilingual & International

Native Chinese · Japanese JLPT N1 · English TOEIC 825. At JASM, handles direct communications with overseas HQ and collaborates with a multinational engineering team.
